

SCM System

INSTALLATION INFO/HELP v1.0.0

Installation Steps

Step-1

You will find two files in setup folder 1.setup.exe and 2.SCM Setup.msi

If you are not sure that you are having the supporting softwares required to run SCM System please install setup.exe first it will automatically download and install the required software for running SCM.

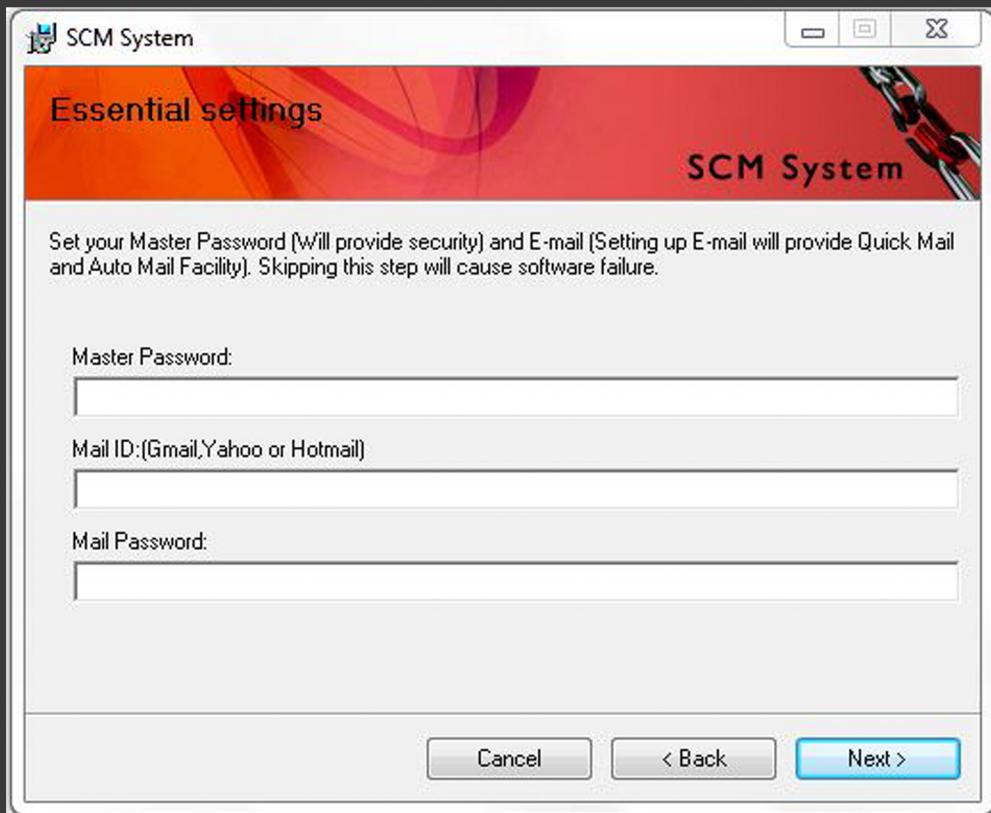

After completion of setup.exe SCM Setup.msi will automatically start.

Step-2

When SCM Setup.msi will run you will see this screen. Click on Next to continue Installation.

Step-3

This step is important to make SCM System more Secure and Reliable.

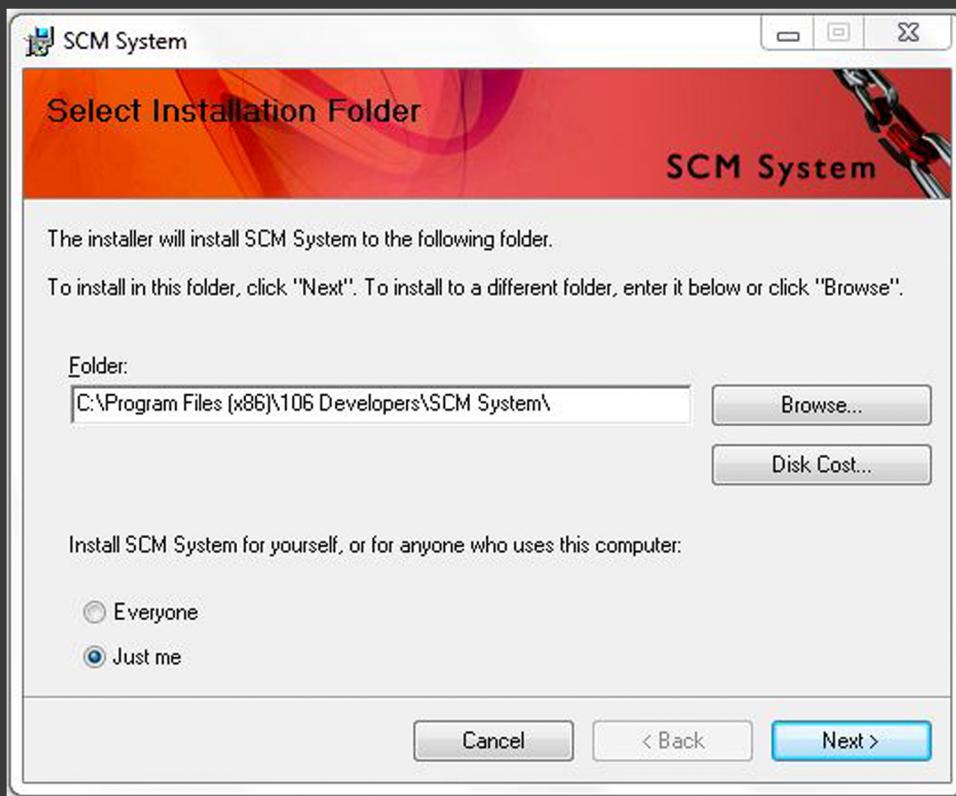

Setting up Master Password will prevent unauthorized person to use your SCM System.

Setting up Mail Credentials will provide Facilities like Quick Mail.

Skipping this step will not allow you to use Quick Mail facility or will causes software failure.

Set Essential Settings and click Next to continue Installation.

Step-4

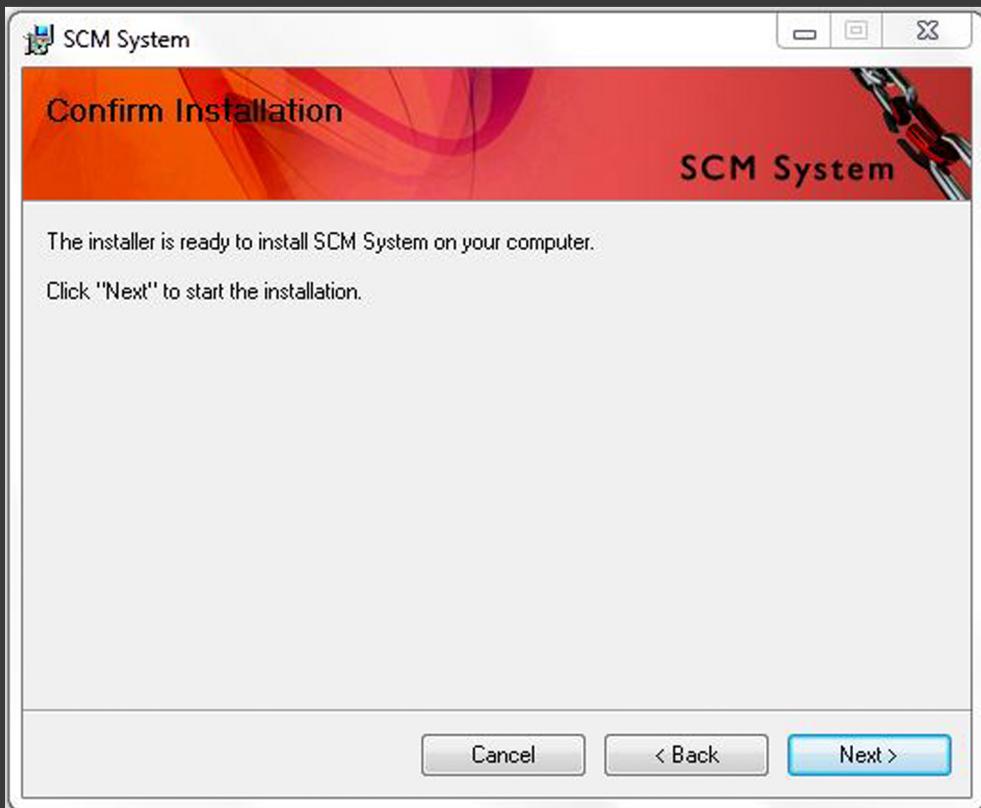

Set the location where you want to install the SCM System.

You can change the location by clicking on “Browse” Button.

If only you are going to use it select “Just me” or if every user on this PC is going to use it then select “Everyone”.

Now click Next to continue Installation.

Step-5

This is the last and the final step.

To Confirm Installation of SCM System Click on Next.

You are Done.
